

I oppose HR 4026, which represents another attempt by the National Association of Broadcasters (NAB) to restrict satellite radio from offering traffic and weather and other valuable services to its listeners.

I am an XM radio subscriber with three receivers. The programming is of a variety not available on our local stations. Although XM does not offer local traffic and weather for the Kansas City area they should not be prohibited from doing so in other markets. NAB member should spend their money improving the programming they offer and not on lobbying efforts to stifle the growth of other outlets that compete for their listeners.

Thank you.
